

# SHURLITE ROUND FILE LIGHTER

## MOST POPULAR WELDOR'S LIGHTER

This lighter features the largest hood and round file in the industry, with a patented assembly. Used by more weldors than any other, its enduring popularity is merited by dependable performance, ease of operation, light weight, and low cost.

PATENT NO. 2,727,375

### IMPORTANT FEATURES

- A. **LARGER HOOD TRAPS MORE GAS.** The specially designed hood is larger and deeper; traps more gas for positive ignition, also protects cutting edges of file. Bright zinc plated.
- B. **EXTRA LARGE ROUND FILE** is full  $\frac{3}{8}$ " diameter, the largest in the industry. Contains 1.18 square inches of sharp, keen, cutting surface. A slight turn from time to time provides a fresh surface for the flint.
- C. **LARGE SPARK TIP** can produce as many as 1500 ignitions. Equipped with 6/40 threads for quick and easy replacement. Flint is finest quality ferro-cerium.
- D. **HIGH TENSILE STEEL WIRE** will retain its spring tension. Bethanized (electro zinc plated) and polished for attractive appearance and rust prevention.

No. 2001 SHURLITE ROUND FILE LIGHTER. . . . . Retail List .35

Packaged one dozen to box, shipping weight 24 lbs. per gross.

## SHURLITE SINGLE-FLINT RENEWALS

The fine quality of the flint used in Shurlite Renewals will maintain or improve the sparking of any single-flint lighter. Equipped with the industry standard 6/40 threads, they will fit almost all lighters of this type.

Actual Size  
NO. 2001X STANDARD RENEWALS  
9/64" diameter flint set in aluminum holder. Can produce 1500 ignitions.

### IMPORTANT FEATURES

1. **FINEST QUALITY FLINT**, just right for maximum ignitions with minimum file wear. Unconditionally guaranteed.
2. **ALL FLINTS PROTECTED** against humidity by a glossy black protective coating which also improves appearance.
3. **EQUIPPED WITH 6/40 THREADS.** Will fit all standard threaded lighters.
4. **THREADED END COUNTERSUNK** for easy starting on lighter threads.
5. **PACKAGED SIX TO SPECIAL BOX.** The slide cover will open only part way, making it impossible to accidentally spill contents.

Actual Size  
NO. 2501X HEAVY DUTY RENEWALS  
4 millimeter diameter flint set in brass holder. Can produce 2000 ignitions.

No. 2001X SHURLITE STANDARD RENEWALS, per box of six . . . . . Retail List .40

No. 2501X SHURLITE HEAVY DUTY RENEWALS, per box of six . . . . . Retail List .50

# SHURLITE THREE-FLINT LIGHTER

## A QUALITY TOOL OF THE WELDING TRADE

Value well worth the price is built into this superb weldors' lighter by the rugged frame, three large flints, long lasting round file, and bright plated finish. It will supply a profusion of hot sparks for dependable ignition under all working conditions.

### IMPORTANT FEATURES

- A. **THREE LARGE FLINTS** afford three times as many ignitions. When one flint is worn down, the slotted screw is released, and a fresh flint is rotated into position. When all three flints have been used, the assembly may easily be replaced with a Shurlite Three-Flint Renewal.
- B. **LONG LASTING ROUND FILE** has more than one square inch of sharp cutting surface. A slight turn provides a fresh surface for the flint, maintaining efficiency. Designed and hardened by spark wheel specialists.
- C. **STURDY, HAND GRIP FRAME** is made of ½" x .080" round edge flat steel, with bright tinned finish for attractive appearance and rust prevention. Strong and durable.
- D. **PLATED HOOD** protects file and forms a pocket for the gas, aiding prompt ignition.

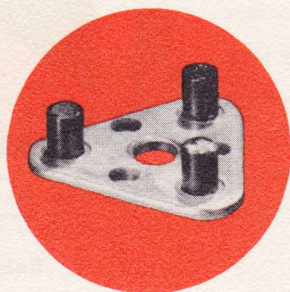

SHURLITE THREE-FLINT LIGHTER . . . . . Retail List .60
